Vogt, U.
TRIAL OF LONG-TERM TREATMENT OF MULTIPLE
SCLEROSIS WITH TOLBUTAMIDE. 15 Jan 63, 3p.
Order from SLA \$1.10 63-10905

I. Vogt, U.

Trans. of Medizinische Klinik (West Germany) 1962,
v. 57, p. 1016-1017.

DESCRIPTORS: Therapy, *Multiple sclerosis, *Orinase,
Hypoglycemia, Drugs.

Nineteen patients with multiple sclerosis were treated
up to 10 months with tolbutamide, first as bed patients
and then ambulatory. During this long-term treatment
relapses were observed in four patients, after an
initial improvement in neurological symptomatology.
In none of the other cases could a change in the course
of the disease be demonstrated. A relationship be-
tween a disturbance in carbohydrate metabolism, the
course of the disease, and the use of tolbutamide was
not observed.

ON THE THEORY OF THE X-RAY DISTRIBUTION
CURVES FOR LIQUIDS AND AMORPHOUS SUB-
STANCES. [1960] [29] p. 35 refs.

Order from SLA mi\$2.70, ph\$4.80

61-10655

Trans. of Zeitschrift für Physik (West Germany)
1958, v. 150, p. 215-230.

The statistical frequency distribution for liquids and
amorphous substances is obtained experimentally, by
a Fourier transformation of X-ray scattering intensi-
ties. It is impossible to avoid a cut-off effect, which
distorts the "radiographic distribution curve" so ob-
tained in a characteristic manner. The degree of dis-
tortion depends on the magnitude of the statistical
deviations of the atom sites in the irradiated volume
and on the limit of measurement of the scattering in-
tensity. In order to examine these influences, the
equation for scattering intensity in liquids and amor-
phous substances is derived. The Fourier transform

TENDERING OF CELLULOSE FIBERS BY HYPOCHLORITE, IN DEPENDENCE OF REDOX POTENTIAL, rH AND pH VALUE. [1961] 7p. 5 refs.
Available on loan from SLA 61-14504

Trans. of Deutsch[e] Textiltech[nik] (East Germany)
1957, v. 7, no. 10, p. 573-574.

The bleaching and tendering action of hypochlorite liquors is a function of the rH value and of the HOCl-concentration. The magnitude of both factors is determined by the pH value, so that the practical man has only to adjust the latter and maintain it constant, and can omit the measurement and calculation of redox potentials and rH values.
